---

Becky,

In reply to your previous questions, I sent you all the data we have. There is no report associated with the data. The subslab samples were collected in an attempt to find sources. We referred the school to the removal program for further indoor sampling, they should be in the process of assigning the site to an OSC.

I'll ask ERT's contractor for additional info and cc you so he can reply to both of us.

Denise

Hi Denise, could you copy me on any communications like this in the future? Also, I sent a few questions related to the data, about a month ago I think. Have you had a chance to look at that? Sorry i cant re-send the email, I'm away on travel this week and have limited access with webmail.

Thanks

Becky Ofrane-Hughes

Jeff and George,

Here is attached some preliminary figures with the data table for you to review and discuss. I think we got some really good data.

Print this package in 11x17 to be able to read it.

Thanks,

Jon

If you have any questions, you can try my cell phone next week, but I'm not promising that I'll be able to get it.

The message is ready to be sent with the following file or link attachments:

Hi Denise,

Could you send Michael and I a copy of ERTs subslab data from their Cabo Rojo sampling event?

Thanks  
Angela
